Powered by **TheraDriver**

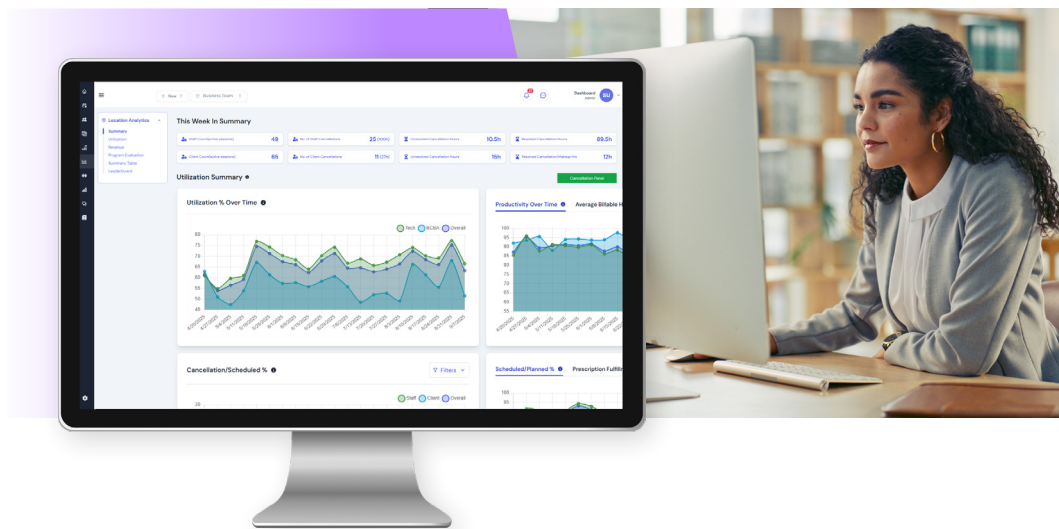

Smarter Scheduling Stronger ABA Practices

Optimize schedules instantly and keep care moving forward

Schedules shift. A child gets sick, traffic stalls, a technician calls out, or authorizations change. With **RethinkBH + AI Scheduling powered by TheraDriver**, your team can rebuild schedules in seconds while keeping clinical and billing workflows in sync. No manual reshuffling. No disconnected tools. Just care that stays coordinated.

1 connected workflow for clinical, operational, and scheduling efficiency

1,500+

1500+ evidence-based treatment plans and automated notes to streamline documentation

Smarter Scheduling, More Time for Care

Get intelligent scheduling visibility in one connected system.

One-Click Optimization

Rebuild complex schedules in seconds, balancing staff, clients, authorizations, and travel time.

Better Matches, Smarter Coverage

Match clients and staff by skill, availability, location, and caseload needs.

Automated Updates

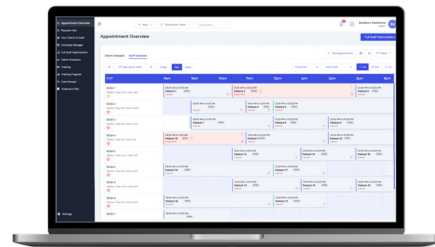

Keep teams and families aligned with instant notifications, even when schedules change.

The Intelligence Behind High-Performing Schedules

RethinkBH + AI Scheduling powered by TheraDriver adapts in real time, recalculating coverage and availability as conditions change.

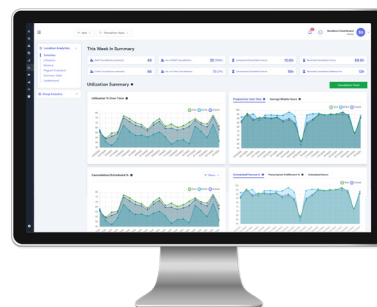

Reduce Cancellations, Accelerate Recovery

- Rebuild optimized schedules in seconds to minimize gaps and missed sessions.
- Coordinate staff, clients, authorizations, and travel time automatically.
- Recover openings faster and reduce manual rescheduling.

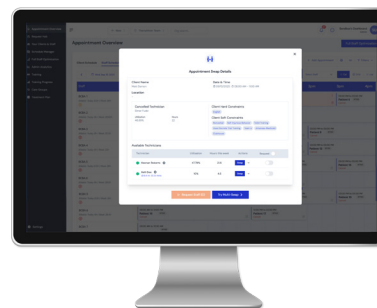

Drive Utilization

- Intelligently pair clients with the right staff based on qualifications, availability, and care needs.
- Automate schedule-change notifications to protect coverage.
- Use drive-time and availability insights to make faster decisions.

Transform Scheduling Performance

- Flow accurate schedules directly into RethinkBH clinical and billing workflows.
- Keep scheduled hours, session notes, and claims consistent within one system.
- Maintain visibility into utilization, attendance, and operational performance.

RethinkBH and TheraDriver combine connected workflows with advanced scheduling intelligence. Optimization happens in real time within a connected system that unifies scheduling, clinical, and billing workflows.
